

Welcome to your home learning challenge leaflet! We don't know exactly how long you'll be off school, so we're suggesting a wide range of activities for you to have a go at. For every challenge you complete, you'll receive one sticker on your reward chart when you get back to school. There will be certificates and prizes on offer for people who complete lots of challenges! We can't wait to see what you manage to achieve!

### Challenge one... Learn a Language!

Here's one for the whole family! Yes, we're being serious - we don't do things by halves at Greenlands! The free website 'Duolingo' or app 'Duolingo Kids' is an incredibly simple way to learn a language in your own home. Although you need to be 13 to get the app, the content is suitable for children of all ages. What better thing to try as a family? Your challenge is to choose any language you'd like to learn together (or on your own) and have a go at it. If you can say one simple sentence to a member of staff back in school, you'll earn your sticker! Go on...

### Challenge two... Reading

Record your daily reading in your reading diary. Five days is worth one sticker. Write a review for an extra sticker!

### Useful website links:

We'll share more website links on [www.anstongreenlands.org](http://www.anstongreenlands.org), but here are a few sites to start with:

- PhonicsPlay ([www.phonicsplay.co.uk](http://www.phonicsplay.co.uk)) have made their games and resources free. Aimed at FS2-Y2.
- BBC Bitesize ([www.bbc.co.uk/bitesize/primary](http://www.bbc.co.uk/bitesize/primary)) is an excellent resource. Aimed at Y1-6.
- Twinkl's resources are free for a month. Go to [www.twinkl.co.uk/offer](http://www.twinkl.co.uk/offer) & use code UKTWINKLHELPS.
- TTS ([www.tts-group.co.uk](http://www.tts-group.co.uk)) have created downloadable workbooks for all primary ages; worth a look!

### Challenge three... 50 Things

Can you complete any of the challenges from your '50 Things to Do Before You Leave Greenlands' book? Each new task is worth one sticker.

# Home Learning Challenge

### Challenge four... Maths

Earn stickers by keeping a maths diary in the back of your exercise book, telling us what maths you've done each day (an adult could fill this in for younger children). We'll post new ideas for games and challenges on the school website's class pages each week. Y2 upwards – TT Rockstars!

### Challenge five... The Project!

Choose something you're interested in to do a project on. This could be anything at all! Here are a few suggestions covering a range of ages:

- Football (or any other sport)
- Animals (or one animal in particular)
- Dinosaurs
- Holidays
- Harry Potter
- Hey Duggee!
- Greek gods and goddesses
- Aeroplanes / tractors / trains
- A famous person or character

Your project could include anything you like, but here are some suggestions:

- A title page / contents page
- A made-up story
- Some facts about your subject, presented in an unusual way
- Some artwork – perhaps a pencil sketch or a collage?
- Some maths – for example younger children could do something involving counting / addition / subtraction; older children could create a graph about their subject
- A model – can you build something using cereal boxes etc.? You could take a photo if your model is very big!
- Anything else you can think of!

Every part of your project is worth one sticker, so the more things you add, the more stickers you can earn! You could use your exercise book for this challenge if you like.
